GENERAL INFORMATION:

EDGE40VS Conveyor ovens are designed to be stacked two high. Each oven has a 32” wide conveyor belt and a 40” long baking chamber. The VS stands for value series and is the most affordable EDGE oven available.

STANDARD FEATURES:

- **AFFORDABLE** = EDGE40vs ovens are affordably priced with an initial acquisition cost similar to that of a good quality reconditioned oven.
- **BURNER** = The EDGE40vs ovens use a standard on/off burner assembly that has been the standard in the industry for the past decade.
- **OPERATING COSTS** = Overall operating costs of the EDGE40vs oven is about .80 cents per hour based on an oven temperature of 475 deg F, electricity costs at .10 per kwh, and natural gas costs at \$1.30 per Ccf.
- **DESIGN** = EDGE40vs ovens are riveted and welded together and do not use the modular design. By using this standard assembly method the labor cost to construct the EDGE40vs is greatly reduced.
- **REMOVABLE CONTROL CABINET** = EDGE40vs control cabinet houses all the electrical and gas components except for the main motor. The control cabinet can be unbolted and returned to the factory for service or upgrades. An additional control can may be used as a spare to eliminate any trouble shooting or repairs to be done in the field.
- **CONSTRUCTION** = EDGE40vs ovens are manufactured to exacting tolerances and use stainless steel exterior with some galvanealed interior parts to reduce material cost
- **WARRANTY** = EDGE40vs ovens come with a detailed two year parts and labor warranty.
- **VENTALATION** = EDGE40vs ovens must be used under a ventilation hood only. Hood system must conform to all local and applicable codes.
- **MANUFACTURING** = EDGE40vs ovens are manufactured in our Dunbar, PA facility
